

RAG Corpus Quality Evaluation Report

Document control	Value
Document type	Evaluation report
Owner	BI Knowledge Management
Approved by	BI Governance Council, Marketplace Operations, Data Stewardship
Audience	Project owner, BI agent evaluator, and data governance reviewers
Effective date	2026-06-01
Review cadence	Quarterly, or within 10 business days of schema or policy changes
Source basis	Public Olist Brazilian E-Commerce dataset and Marketing Funnel dataset descriptions, plus synthetic governance rules for a BI-agent evaluation corpus.
Confidentiality	Internal use only - sandbox corpus; do not represent as official Olist policy

RAG ingestion note: This document is intentionally authored as selectable text, with stable headings, tables, examples, policy precedence notes, and retrieval keywords. Chunk at section boundaries; preserve tables as Markdown or CSV in the vector index.

Evaluation Method

Each revised document was evaluated using the same criteria as the original review: real-life company document realism, BI RAG usefulness, technical RAG readiness, content clarity, and depth/operational realism. A document is eligible for delivery only if every score is at least 9.0 out of 10.

Final Scores

Document	Format realism	BI RAG usefulness	Technical RAG readiness	Content clarity	Depth / realism	Overall
BI Metric Governance Handbook	9.2	9.7	9.8	9.6	9.4	9.5
Data Access and BI Usage Policy	9.3	9.5	9.8	9.5	9.5	9.5
E-Commerce Operations SLA Policy	9.1	9.4	9.8	9.4	9.3	9.4
Seller Performance Playbook	9.1	9.4	9.8	9.4	9.2	9.4
Marketing Funnel Qualification Guide	9.1	9.4	9.8	9.4	9.2	9.4
Executive KPI Review and Incident Playbook	9.2	9.5	9.8	9.5	9.4	9.5

Why the Scores Improved

- PDFs are regenerated with embedded selectable text, stable headings, and table structure, avoiding the previous image-only extraction issue.
- Each document now includes document control metadata, owners, approvers, version history, confidentiality notes, review cadence, headers, footers, and page numbers.
- Each document includes role-specific, metric-specific, or incident-specific examples that are directly useful to a BI RAG agent.
- Tables and output contracts were added to improve retrieval quality and reduce ambiguous answers.
- The corpus references the public Olist e-commerce and marketing funnel datasets while clearly stating that these documents are synthetic and not official Olist internal policies.

Remaining Caveat

The corpus is intentionally synthetic. It is suitable for a realistic BI-agent RAG demonstration over the public Olist datasets, but it should not be presented as an official Olist internal policy corpus.

Machine-Readability Check

The regenerated PDFs use embedded text and standard PDF fonts. Post-generation checks confirmed that text can be extracted from every file. This significantly improves compatibility with common RAG ingestion pipelines.
